

Dishwashers

AEG-Electrolux dishwashers deliver state-of-the-art performance with no compromise on the result, irrespective of the load. The majority of our range is AAA rated and is designed to give the best results in terms of cleanliness, shine, dryness, time, noise, water and energy consumption.

PERFEKT IN FORM UND FUNKTION

AEG
Electrolux

Design

Stylish design with a high quality build.

Stylish design.

AEG-Electrolux dishwashers combine stylish design with robust, high-quality build to fit perfectly into any kitchen size or layout. Standard sized dishwashers can be either fully-integrated behind furniture or semi-integrated with the stylish display on show. For kitchens where space is at a premium, there is a slimline dishwasher or a compact dishwasher, which perfectly co-ordinate with AEG-Electrolux compact products.

Whisper-quiet operation.

AEG-Electrolux has the world's quietest dishwasher range, which is economical by design, combining energy efficient operation with unbeatable performance.

Fully-integrated dishwasher.

The dishwasher is hidden behind a full height furniture door and operated by controls on the top edge of the dishwasher door.

Semi-integrated dishwasher.

The dishwasher has a visible control panel, which matches in height to the control panel of an oven and drawer line furniture. A short furniture door is fixed below the control panel.

Slim-line dishwasher.

A 45cm fully integrated dishwasher for smaller spaces.

Compact dishwasher.

Ideal for smaller households or apartments, where kitchen space is at a premium. Mix and match with the AEG-Electrolux range of compact products.

Performance

Top performance on all levels.

Energy efficient.

AEG-Electrolux is committed to minimising the amount of electricity, water and detergent used by household appliances. Three elements are measured: energy rating (running costs) wash performance (cleanest results) and drying performance (quickest drying results).

Many models now consume only 12 litres of water and most of our dishwashers have eco-friendly 'AAA' class ratings, achieving maximum energy efficiency and carrying the endorsement of the Energy Savings Trust. The economy 50°C wash programme is more energy efficient and environmentally friendly and offers an extended wash programme at lower temperatures. This reduced energy consumption not only helps to care for the environment but saves money for users as well.

www.energysavingtrust.org.uk

Perfect results.

AEG-Electrolux dishwashers are designed to give excellent performance, no matter what the load.

Advanced fuzzy logic.

Advanced fuzzy logic delivers perfect washing performance whilst keeping water, electricity and detergent consumption to a minimum. To ensure all food debris is removed the wash phase thoroughly cleans and the rinse phase makes sure dishes are thoroughly rinsed of any wash residue and are shiny and streak free.

Automatic sensors.

Automatic water sensors measure how dirty the water has become in the pre-wash cycle and assess how much more water is needed to clean the dishes perfectly.

Eat-Load-Go.

Delivers an 'A' class wash performance in just 30 minutes, giving great results in no time.

Auto load.

The auto load program calculates the optimum programme required for the load, adjusting water and electricity accordingly. If the machine is only loaded with a few lightly soiled dishes, it will use less water than for a dirty load. Perfect results every time.

Multi-tab.

All models also come with a multi-tab button which optimises the cleaning results of all popular all-in-one detergents (3-in-1, 4-in-1 and 5-in-1). It modifies the time and temperature of each phase of the programme to ensure that the different elements of the detergent are used at the correct part of the cycle, giving sparkling glasses and crockery with no smearing.

Finish detergent products are recommended for use in the AEG-Electrolux range of dishwashers, to achieve exceptional cleaning performance.

Features

Enhanced flexibility at all levels.

Convenient loading.

Clever dishwasher storage means you can get the most out of each wash load. The flexible upper basket is height-adjustable, allowing large plates and dishes to be fitted in with ease, even when fully loaded.

This feature is complemented by foldable bottom plate supports which fold down to accommodate larger pots, pans or casserole dishes. Other features such as the long stemmed wine glass holders give total flexibility and care for the most delicate items.

Interior illumination.

To enable easier loading and unloading the majority of our dishwashers have interior illumination.

Fold out basket.

The fold out cutlery basket enables cleaned sets of cutlery to be removed from dishwasher more easily and hygienically.

Extra high.

The F75011ViL dishwasher provides extra space within the dishwasher allowing more flexible loading for large plates, pots and pans. It can also be installed under higher worktop surfaces without leaving unsightly gaps.

Standard Dishwasher

Reassurance

Gentle on your glasses.

Protecting your glasses.

AEG-Electrolux has developed a glass programme you can really trust. Glass-care 45°C is powerful enough to thoroughly clean glasses, yet gentle enough to care for sensitive glasses. Apart from having programmes to care for your glasses we also have adjustable glass supports to provide extra stability.

Rinse hold.

A cold rinse removes food deposits and holds the wash until you have a full load - a really efficient way to use the dishwasher.

Reassurance on performance.

With just a glance at the control display our models are able to provide immediate feedback so you get the best wash result every time. The LED display indicator indicates the stage of the programme for perfect time management.

Rinse aid and salt indicators.

Rinse aid and salt indicators tell you when more salt or rinse aid is required preventing cloudy, streaky glasses.

Intensive-care 70°C.

For an ultra clean wash the new advanced intensive-care 70°C wash is an intensive wash cycle where the final hot rinse is extended by 11 minutes, thereby producing a more hygienic wash.

Aqua control.

Aqua control provides complete peace of mind by measuring the amount of water coming into the dishwasher. If any leaks are detected, sensors prevent water entering the dishwasher. On some models, there is also an aqua alarm, which draws attention to the issue.

Features

Perfect time management.

Control over your time.

Using the practical delay start function means the start of the programme can be delayed until a time that suits you. The time remaining feature displays exactly how many minutes the wash cycle has left, putting you in complete control.

The LCD display provides information & feedback about the programmes and possible options, to ensure you are in full control. It is advanced yet very easy to use. Models with the LED displays shows delay start information along with the time remaining.

'In operation' spotlight.

Since AEG-Electrolux dishwashers are so silent in operation, several fully-integrated models have a red beam which projects onto the floor to show that the programme is running.

Eat-Load-Go 60°C wash.

The only 'Quick Wash' that delivers an 'A' wash in 30 minutes. Ideal for dinner parties, use the same starter crockery for the dessert.

Stylish integrated dishwasher with full stainless steel door.

F98010IMM

Extremely quiet dishwasher at only 41dB(A) noise level! Beautifully designed to complement our range of AEG appliances with a full stainless steel door and advanced LCD display providing easy control and immediate programme feedback.

- Sensorlogic delivers the best wash performance whilst keeping water, electricity and detergent use to a minimum
- Extra spray arm to ensure ultimate cleaning efficiency
- Eat-Load-Go - delivers an 'A' wash result in just 30 minutes, giving great results in no time
- Multi-tab detergent option ensures perfect wash results whether you use 3-in-1, 4-in-1 or 5-in-1 tablets
- Very low 12 litre water consumption without compromising wash results
